Introduction

This document contains a manual for two applications: -eoPages and eoMall. For both applications was used similar infrastructure. Applications are used to publish attractive marketing content and to popularize companies and the services they offer. Therefore, there may be minor differences in the data in the guidelines with the portal. As the project develops, the document will be updated and supplemented

The first part of the document is about eoPages, the second part is about eoMall.

EOPages is a marketplace between the Earth Observation Service Industry & Users. EOPages shows the capabilities of the geo-information industry in general and value-adding companies in particular. The objective of EOPages is to help potential customers explore the available value-added geo-information services of interest to them in a new and user-friendly way.

Parsec is an accelerator that supports the development of platforms such as eoPages. PARSEC inspires and stimulates businesses to fully make use of geo-data. With support from the EU, the project provides SMEs and startups with the tech tools, the funding, the market access, and the knowledge to develop the businesses of tomorrow.

Both applications use the text uniqueness checker.

Support tools:

- To check if your *content will be clear for a wide audience*, you could use: <http://gunning-fog-index.com/>

This is a tool that tries to calculate the Gunning Fog Index. The Gunning fog index is a readability test for English writing. The index estimates the years of formal education a person needs to understand the text on the first reading. The fog index is commonly used to confirm that text can be read easily by the intended audience. Texts for a wide audience generally need a fog index less than 12. Texts requiring near-universal understanding generally need an index less than 8.

1. eoPages

2. Main Page

This is the main page which is displayed after entering the eoPages portal. The content of the main page is supplemented when any user completes the content of his pages.

2.1. Goals

- Enabling presentation of content published by companies
- Adding functionalities enabling easy information searching

2.2. Elements

Picture 1 below shows the Main page with the correct content. The numbers on the page indicate the main elements, which the user needs to perform on their own in the administration panel. The red circles with numbers inside located next to the element.

Next, each element will be viewed in more detail.

Figure 3

2.2.1. Header navigation

- Home button – always redirects to the main page
- Services button - no matter which page you are on, it opens a pop-up for search
- Companies button – redirects to company address book page, where user can search for company

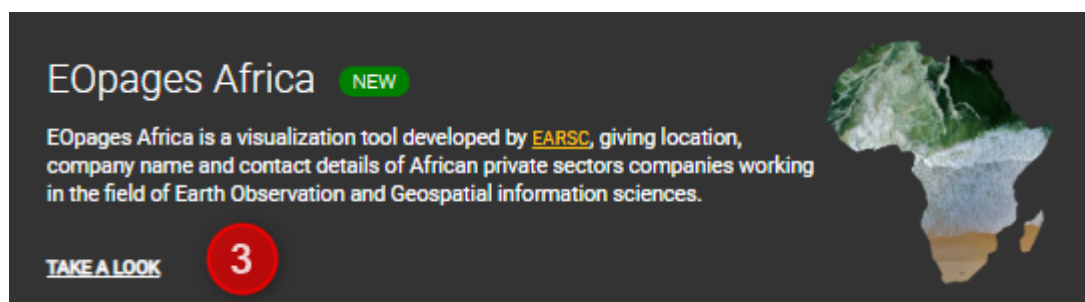

2.2.2. Login and registration

- JOIN with COIH - redirects to the COIH authorization page
- Login - allows you to log in using your email and password
- Register - registration functionality

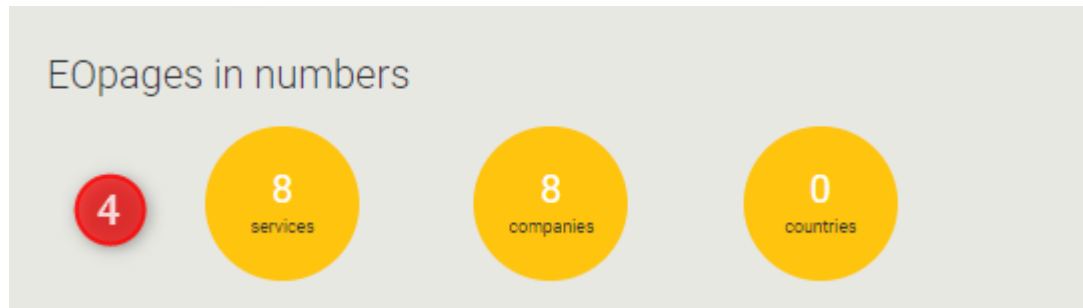

After registering, the user will be granted the rights to view the content of the pages only. In case the user wants to register the company, he must contact the EARSC operator. Only after confirmation by the EARSC operator can the user create such content as a Company page, Service page, Success Stories.

2.2.3. eoPages Africa

- The link to eoPages Africa - website contains a map with companies working in the field of Earth Observation

2.2.4. eoPages in numbers

- Counter indicating the amount of content on the page
 - Number of services published on the site
 - Number of companies with their profile
 - Counter indicating the number of countries in which companies operate

Each of the counters is a link that redirects to the selected content

2.2.5. search engine functionality

The search interface features a header with the word "Search" in bold. Below it is a search bar with a dropdown menu on the left showing "All" and a search input field with the placeholder text "Type to search...". To the right of the input field is a yellow search button with a magnifying glass icon. Further right is a red circular counter displaying the number "5". Below the search bar, there is a section for "POPULAR SEARCHES:" followed by a list of search terms: [product](#), [renovatio](#), [sentinel](#), [forest](#), [smart cities](#), and [turbidity](#).

- Each query redirects the user to the search page
- On the right, the user can select a filter for the content displayed on the search page
 - All
 - Companies
 - Services
 - Success Stories
- Popular Searches - most common value search

2.2.6. Success stories

6

- Content published by the company
- On the main page has a title and company name, when clicked, detailed information is displayed

2.2.7. Services

LOAD MORE

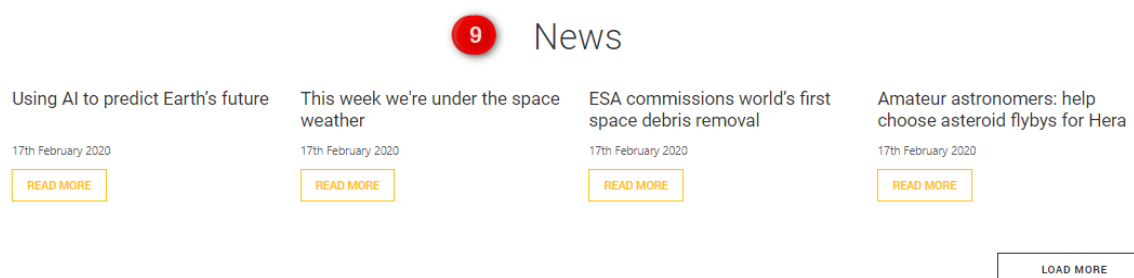

- List of services published on the website

2.2.8. Companies

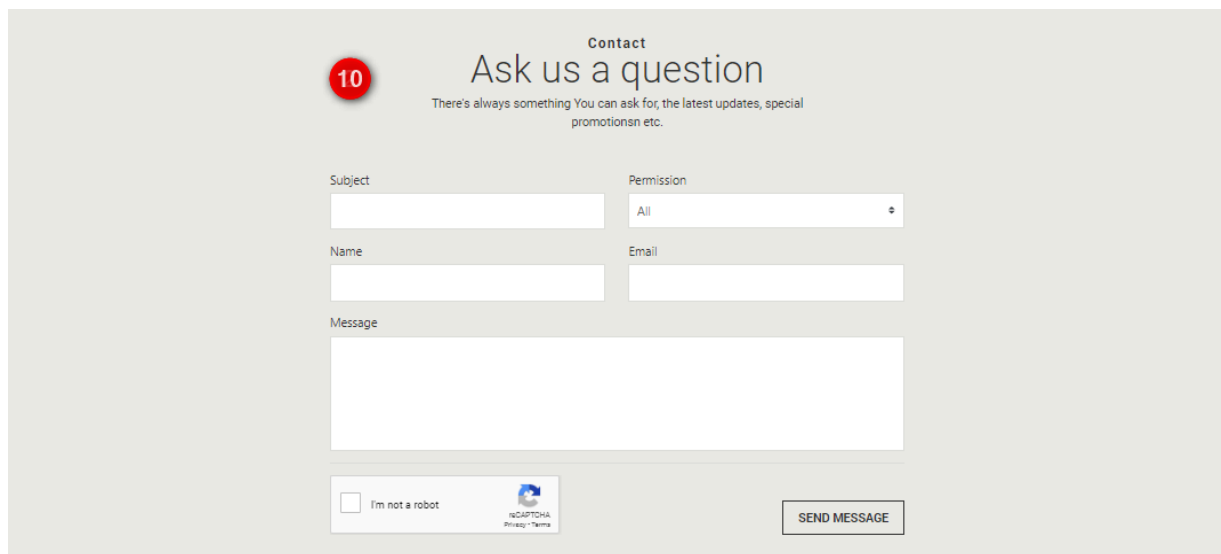

- List of companies with accounts on the website
- Companies are connected using taxonomy
- User can select one or multiple values
- The user does not have to enter the value himself. It is only needed to select the appropriate value from the list (Metadata area in Admin panel).

2.2.9. News

- Structure allowing the content to be published to an external portal
- Each message must have a title, date of publication and a link to an external service
- By clicking on the name or read more button, the user will be redirected to the external portal

2.2.10. Contact form

Contact
Ask us a question
There's always something You can ask for, the latest updates, special promotionsn etc.

Subject:

Permission:

Name:

Email:

Message:

☐ I'm not a robot  [Privacy](#) [Terms](#)

- Contact form allows you to communicate with the operator or selected company
- To contact the company, you must go to the company's website and click on Contact us button
- Permission - contains a list of categories for which you are contacting, the list is modified in Admin panel
- For logged-in users, the captcha module is selected automatically

3. Service Page

This is the main page presenting your Service. To create the content of the Service pages, the user must have Provider rights and access to the Admin panel.

3.1. Goals

- Create attractive content for potential clients.
- Create correct visual side of Service page within the portal.

3.2. Elements

Picture 4 below shows the Service page with the correct content. The numbers on the page indicate the main elements, which the user needs to perform on their own in the administration panel. The red circles with numbers inside located next to the element. Next, each element will be viewed in more detail.

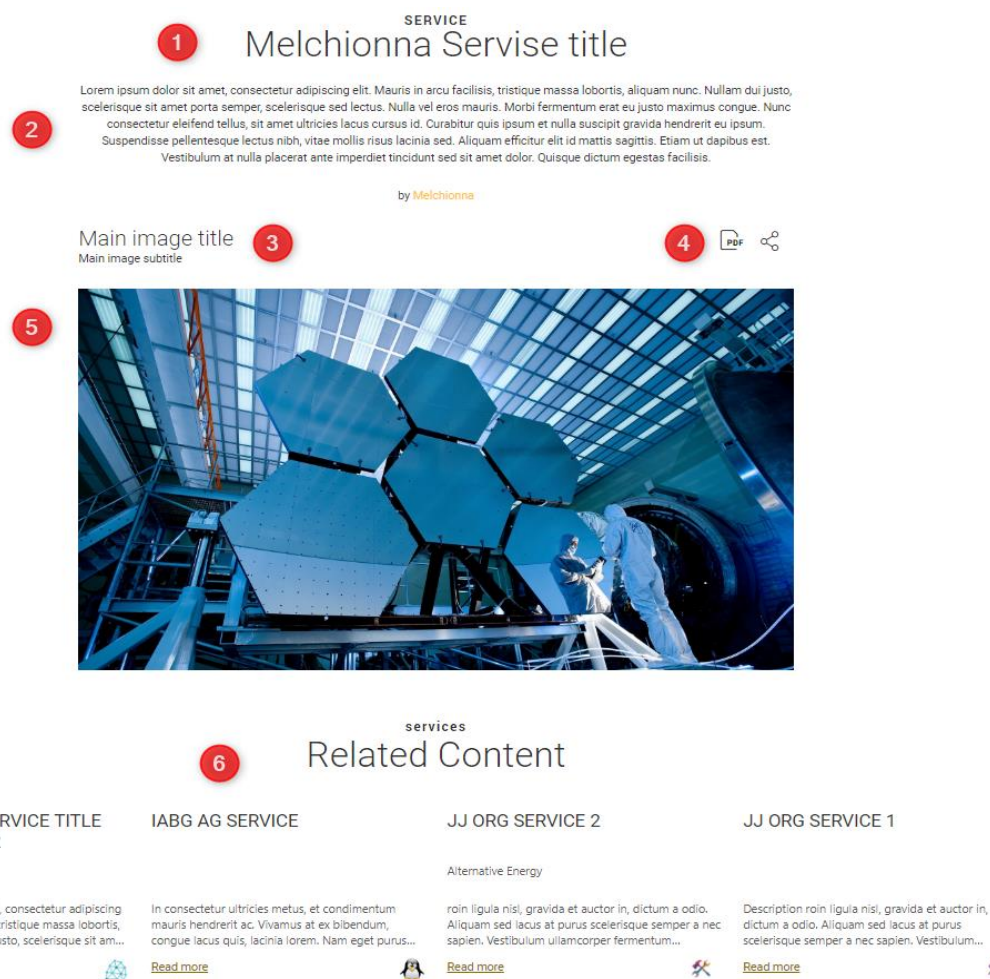

Figure 4

3.2.1. Service name

1 SERVICE Melchionna Servise title

- Brief name of service as assigned by the Service provider.
- As a result, the title should be no more than 2 lines long. And as a result, the title will be better read on mobile devices.

3.2.2. Service description

- A description of the Service
- Too short or no description at all will make it difficult to find by the user. The lack of description makes the service less attractive in comparison with other services.

3.2.3. Image title and subtitle

- Image title and subtitle is set in the Administrator panel
- Make sure that the length of the name is not too long

3.2.4. Social media and PDF

- The system allows you to download content into a pdf file
- User can share the content of the page on the social media page. It is allowed to share on:
 - Facebook
 - LinkedIn
 - Witter

3.2.5. Service image

- It is allowed Jpeg, PNG formats
- You should use high-quality images
- You should carefully consider the choice of the image. “Good” image makes the service instantly recognisable.

3.2.6. Related content and taxonomy

SERVICE ON EOPAGES

Figure 6

5.2.1. Success Story Name

- A brief name of the Success story as assigned by the Service provider
- Make sure that the size of the Success story name does not exceed 115 characters

5.2.2. Success Story logo

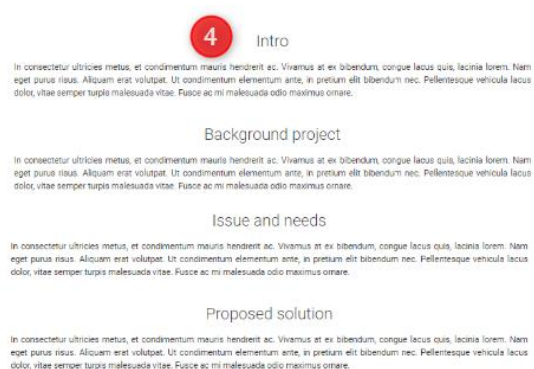

- Every success story is assigned to company
- Logo in a link to company page

5.2.3. Main image

- It could be an image in Jpeg, PNG format
- You should use high-quality images
- In order to make the image look good on big screens recommended image sizes 1470px at 830px

5.2.4. Success Story text

- The text made by the Service provider
- Profile of the Success Story

5.2.5. Success Story info

- Information about the Service to which it is assigned Success Story

5.2.6. Connection with Service

Button which redirects to the page with which Success Story it is associated

6. Services pop-up

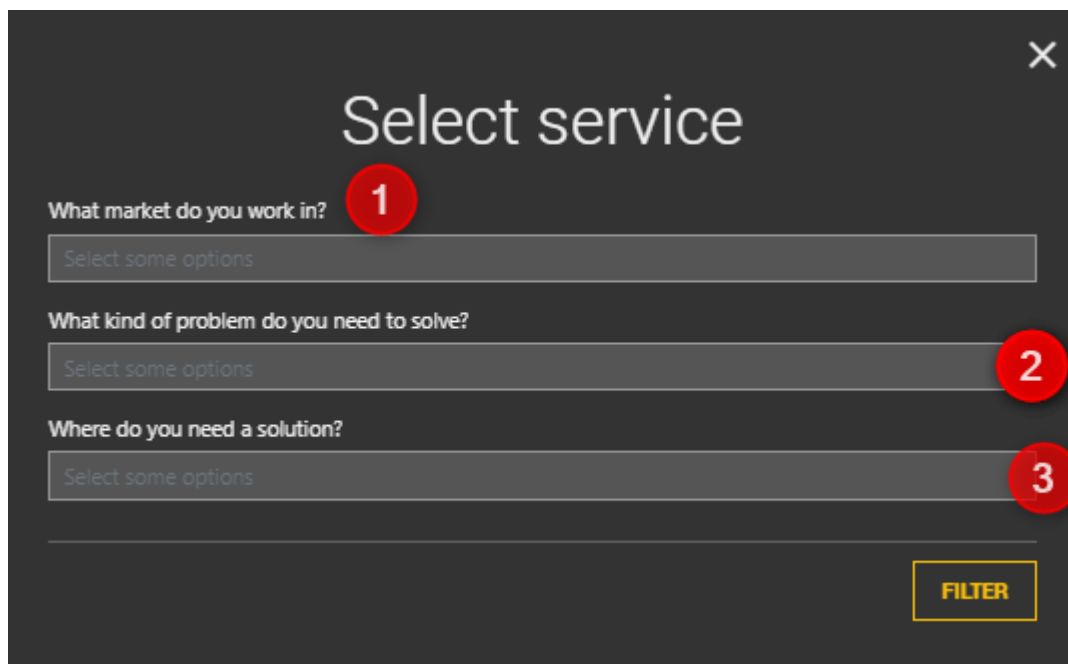

This is pop-up presenting filters for searching page. The selected filters use taxonomy to filter content. To change the content of dictionaries, the user must have Provider rights and access to the Admin panel.

6.1. Goals

- Facilitate searching
- Create attractive pop-up for potential clients

6.2. Elements

Picture 7 below shows the search pop-up with the correct content. The numbers on the page indicate the main elements, which the user needs to perform on their own in the administration panel. The red circles with numbers inside located next to the element. Next, each element will be viewed in more detail.

The image shows a dark-themed pop-up window titled "Select service" with a close button (X) in the top right corner. It contains three input fields, each with a red circle containing a number next to it:

- 1. "What market do you work in?" with a text input field containing the placeholder "Select some options".
- 2. "What kind of problem do you need to solve?" with a text input field containing the placeholder "Select some options".
- 3. "Where do you need a solution?" with a text input field containing the placeholder "Select some options".

Below the input fields is a yellow button labeled "FILTER".

Figure 7

After clicking the filter button, the user will be taken to the Search page. On the left side the filters that were used during the search will be defined. The value from each field will be entered into the filters on the destination page.

6.2.1. Market Sector

Market sector is a dictionary defined in the Administrator panel. Only users with appropriate permissions can change them. The given dictionary refers to the area in which the company operates.

6.2.2. Area of Activity

Area of Activity is a dictionary defined in Administrator panel. Only users with appropriate permissions can change them. The given dictionary refers to actions that are performed by the service.

6.2.3. Location of Interest

Area of Activity is a dictionary defined in Administrator panel. Only users with appropriate permissions can change them. The given dictionary refers to location in which the company operates. The dictionary contains the names of countries and continents with which you can filter content.

7. Company Address Book

This is the main page presenting Company Address Book page. To create the content to display in Address Book user must create company page, the user must have Provider rights and access to the Admin panel.

7.1. Goals

- Facilitate company searching
- Create attractive page with map for potential clients

7.2. Elements

Picture 8 below shows the Success Story page with the correct content. The numbers on the page indicate the main elements, which the user needs to perform on their own in the administration panel. The red circles with numbers inside located next to the element. Next, each element will be viewed in more detail.

Filtering is done by selecting the first letter from the company title.

Figure 8

7.2.1. Company map

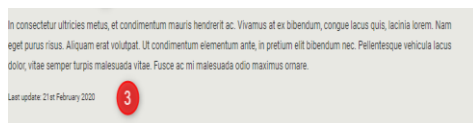

- The blue pin on the map indicates the location of the company
- Location is set in Administrator Panel
- In the absence of a location, the map will be displayed empty

7.2.2. Company Name

- Company name a link which redirects to the Company page

7.2.3. Company Description

- Description of the Company
- Text should include some key numbers (workforce, turnover)
- Recommended not to exceed 100-120 words

8. Search Page

This is the main page presenting Search page. To modify any structure or content the user must have Provider rights and access to the Admin panel.

8.1. Goals

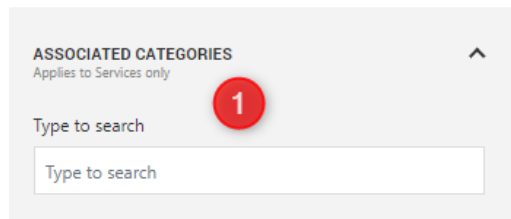

- Facilitate content search
- Enable to search for a specific type of content
- Create attractive page with map for potential clients

8.2. Elements

Picture 9 below shows the Search page with the correct content. The numbers on the page indicate the main elements, which the user needs to perform on their own in the administration panel. The red circles with numbers inside located next to the element. Next, each element will be viewed in more detail.

8.2.1. Associated categories

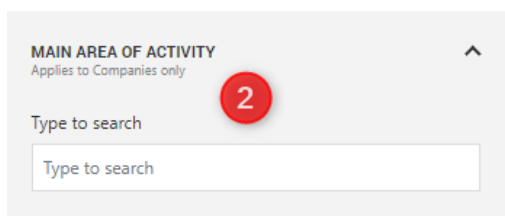

ASSOCIATED CATEGORIES
Applies to Services only

Type to search

Type to search

- Filter that refers to the first field in the search pop-up
- Every value from the market sector field in pop-up will be written to this filter
- The user can change the value or add a new value to the filter

8.2.2. Area of Activity

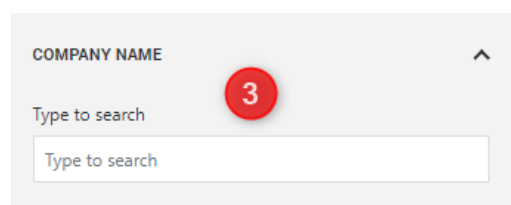

MAIN AREA OF ACTIVITY
Applies to Companies only

Type to search

Type to search

- Filter that refers to the second field in the search pop-up
- Every value from the area of activity field in pop-up will be written to this filter
- The user can change the value or add a new value to the filter

8.2.3. Company name

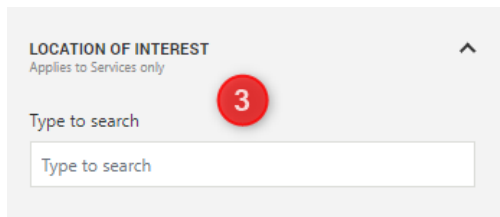

COMPANY NAME

Type to search

Type to search

- Using this filter, the user can search for a company by name

8.2.4. Location of interest

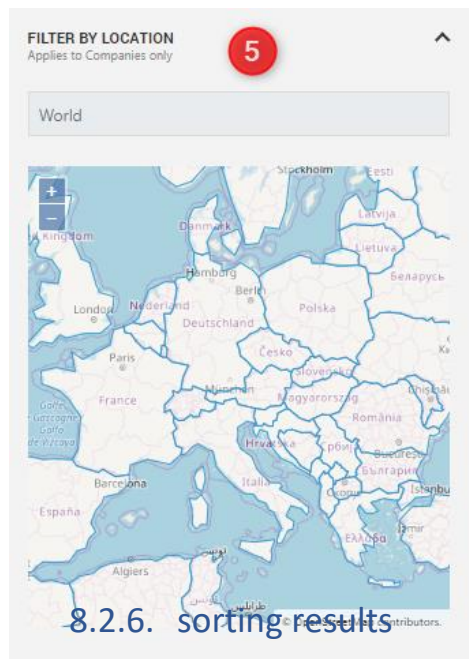

LOCATION OF INTEREST
Applies to Services only

Type to search

Type to search

- Filter that refers to the third field in the search pop-up
- Every value from the location of interest field in pop-up will be written to this filter
- The user can change the value or add a new value to the filter

8.2.5. Filter by location

FILTER BY LOCATION
Applies to Companies only

World

Map showing various countries including: Stockholm, Eesti, Latvia, Lietuva, Beļaruss, Polska, Deutschland, Hamburg, Berlin, Cesko, Slovensko, Rumänien, Ungarn, Österreich, Frankreich, Paris, London, Niederland, Belgien, Dänemark, Schweden, Finnland, Litauen, Lettland, Estland, Polen, Deutschland, Frankreich, Spanien, Italien, Griechenland, Türkei, Israel, Libanon, Syrien, Jordanien, Irak, Kuwait, Saudi Arabien, Oman, Katar, Bahrain, Kuwait, Libanon, Syrien, Jordanien, Irak, Kuwait, Saudi Arabien, Oman, Katar, Bahrain, Kuwait.

- The filter that has no value assigned during automatic searches
- Clicking on any country on the map, the system will detect what country it is and display a list of companies that operate in that country

8.2.6. sorting results

Sorted by: Relevance

The user can sort the search results according to their preferred options

- Relevance
- Newest
- A-Z
- Z-A

8.2.7. Type of content

Search engine allows you to filter by type of content. After selecting the appropriate tab, only this kind of content will be displayed.

EOMALL GUIDELINE

Assistant for your website in eoMALL

ABSTRACT

Guidelines for companies to create the attractive marketing content for the site

Eversis

9. eoMall

10. Introduction

This Guide is intended for companies to create attractive marketing content for the site. This is not the final version of the document. The project is under development. Therefore, there may be minor differences in the data in the guidelines with the portal. As the project develops, the document will be updated and supplemented.

Support tools:

- To check if your *content will be clear for a wide audience*, you could use: <http://gunning-fog-index.com/>

This is a tool that tries to calculate the Gunning Fog Index. The Gunning fog index is a readability test for English writing. The index estimates the years of formal education a person needs to understand the text on the first reading. The fog index is commonly used to confirm that text can be read easily by the intended audience. Texts for a wide audience generally need a fog index less than 12. Texts requiring near-universal understanding generally need an index less than 8.

- To get the *coordinates of a place* you could use: <https://www.google.com/maps>
 - ✓ On your computer, open Google Maps. If you are using Maps in Lite mode, you will see a lightning bolt at the bottom and you not be able to get the coordinates of a place.
 - ✓ Right-click the place or area on the map.
 - ✓ Select What's here?
 - ✓ At the bottom, you will see a card with the coordinates.

11. Company page

This is the main page presenting your Company. To create the content of the Company pages, the user must have provider rights and access to the Admin panel.

11.1. Goals

- Create correct visual side of Company page within the portal.
- Create unique content due to the Google search engine. If the search engine finds two identical contents, it does not index the duplicate content as unique.
- To acquaint the user with the company as much as possible.
- Create attractive content for potential clients.

11.2. Elements

Figure 10 below shows the Company page with the correct content. The numbers on the page indicate the main elements, which the user needs to perform on their own in the administration panel. The number  is located on the left side of the element.

Next, each element will be viewed in more detail.

Common rules:

- Provide content in correct oral and grammatical English language.
- Make sure that this content is unique and not to copy and paste the content of your website.
- You should provide a description and select a value for all parameters that describe your Organization.
- Use simple language to make it accessible to all people, not just professionals.

Company page:

Figure 10

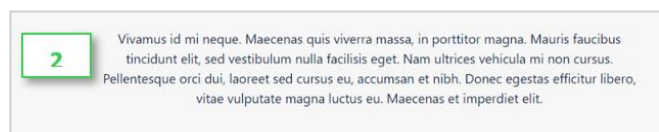

11.2.1. Company Name

- Name of the Company.
- Set official name, as Company registered.

11.2.2. Company Mission

- The short mission statement of the Company.
- It is recommended not to exceed size in 30 words.

Company Mission

11.2.3. Company Logotype

- Official logo of the Company.
- It could be an image in Jpeg, PNG format.
- You should use a high-quality image.
- If possible, provide the image on a transparent background.
- The logo image should occupy the entire space of the image, with minimal indentation.
- If the logo does not fit into the page, it is possible to provide another image with the aspect ratio of 16:9 (horizontal).

IMPORTANT: do not use an image that is too small. Preferred min width and height: 132 px at 75 px (horizontal).

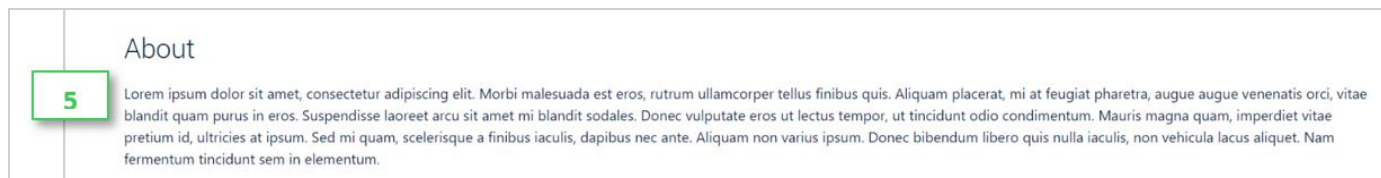

11.2.4. Main Company Image

Main Company Image

- It could be an image in Jpeg, PNG format.
- You should use high-quality images.
- Recommended using the aspect ratio of the images 16:9 (horizontal).
- In order to make the image look good on big screens, recommended image sizes 1470px at 830px.
- You should carefully consider the choice of the image. “Good” image makes the Company instantly recognisable.

11.2.5. Company Description

Company Description

- Description of the Company.
- Text should include some key numbers (workforce, turnover).
- Recommended not to exceed 100-120 words.

11.2.6. Company Taxonomy

a

Company Taxonomy

11.2.7. Company Base information

Company Base information

- List of common parameters for Companies.
- Recommended not to use more than 60 characters (for every parameter).
- If the information is not filled in, the parameter is displayed with an empty value.

11.2.8. Company Location on the Map

- Company's location on the map.
- The displayed point is the coordinates of the Company address.
- You can find the coordinates of a point using Google maps. For a detailed description of how to do this see section 1. Introduction.

Company Location on the Map

11.3. Parameters Table

Page Elements	Parameters (Admin panel)	Comment/Example
Company Name	Company Name	<i>Comment:</i> Official name of the Company as registered.
Company Mission	Mission	<i>Comment:</i> Short mission statement of the Company. Recommended not to exceed 30 words.
Company Logotype	Logo	<i>Comment:</i> Official logo of the Company. The image should have an aspect ratio of 16:9 (horizontal), if possible, and transparent background. For more

		information, see 2.2.3. Company Logotype.
Main Company Image	Header Image	<i>Comment:</i> Large image shown in the header of the company page. The image should have an aspect ratio of 16:9 (horizontal). For more information, see 2.2.4. Main Company Image.
	Search Result Image	<i>Comment:</i> This image will be visible on the search results page and Company previews. Upload this image in case you want to use another image of logotype image. The image should have an aspect ratio of 16:9 (horizontal).
Company Description	Description	<i>Comment:</i> Description of the Company. Text should include some key numbers (workforce, turnover). Recommended not to exceed 100-120 words.
Company Taxonomy	Metadata/Market Sector	<i>Comment:</i> Keywords related to the Company provided for search. Should be selected from the list. For more information, see 2.2.6. Company Taxonomy. <i>Example:</i> Agriculture
Company Taxonomy	Metadata/Thematic (Global)	<i>Comment:</i> Keywords related to the Company provided for search. Should be selected from the list. For more information, see section 2.2.6. Company Taxonomy. <i>Example:</i> Forests, Geology, Floods
	Metadata/Tags	<i>Comment:</i> Keyword tags related to the Company. Could be defined freely by the Company. <i>Example:</i> agriculture, spatial, added value service
Company Base information	Company Certification	<i>Comment:</i> List of certification awarded by the Company.
Company Base information	Company Website	<i>Comment:</i> URL of the Company's website. <i>Example:</i> https://company.com
Company Base information	Company Address	<i>Comment:</i> Postal address of the Company (street, number, zip code, country). You should also specify the geographic coordinates of the address to display the point on the map. <i>Example:</i> Street 10, 02-492, Poland
Company Base information	Company Telephone	<i>Comment:</i> Telephone number of the Company with code. <i>Example:</i> +48 000 000 000
Company Base information	Contact Name	<i>Comment:</i> Name of the Contact - internal use. <i>Example:</i> Joe Jones
Company Base information	Contact Email	<i>Comment:</i> email of the contact - internal use. <i>Example:</i> jjones@email.com
Company Base information	Contact Telephone	<i>Comment:</i> Telephone number of the Contact with code. <i>Example:</i> +48 000 000 000
Company Base information	Company fax	<i>Comment:</i> Fax number of the Company code.

information			<i>Example: +48 000 000 000</i>
Company information	Base	Contact Position	<i>Comment: Position of the Contact in the Company. Example: Manager</i>
Company information	Base	Company Value Chain	<i>Comment: List of Positions in the EARSC eo Value Chain.</i>
Company information	Base	Company RegistrationNumber	<i>Comment: Official registration number of the Company.</i>
Company information	Base	Company HQ Location	<i>Comment: Location of the Company's Headquarter (address). You should also specify the geographic coordinates of the address to display the point on the map. Example: Street 10, 02-492, Poland</i>
		Demo Link	<i>Comment: URL to a demo of a service. It is an external link. This parameter is optional. Example: https://demo_service.com</i>

12. Service page

This is the main page presenting your Service. To create the content of the Service pages, the user must have Provider rights and access to the Admin panel.

12.1. Goals

- Create correct visual side of Service page within the portal.
- Create unique content due to the Google search engine.
- Create attractive content for potential clients.

12.2. Elements

Figure 11 below shows the Service page with the correct content. The numbers on the page indicate the main elements, which the user needs to perform on their own in the administration panel. The number  is located on the left side of the element.

Next, each element will be viewed in more detail. Because we are not experts in earth observation/remote sensing field, the explanations are only about the visual side of what we need for the portal.

Common rules:

- Provide content in correct oral and grammatical English language.
- Make sure that this content is unique and not to copy and paste the content of your website.

- You should provide a description and select a value for all parameters that describe the Service.
- Use simple language to make it accessible to all people, not just professionals.

Page 46 of 75

12.2.1. Service Sub Category

The value depends on the Service type. Every Category could have several sub-categories.

Can be one or multiple values under one type.

The user does not have to enter the value himself. It is only needed to select the appropriate value from the list.

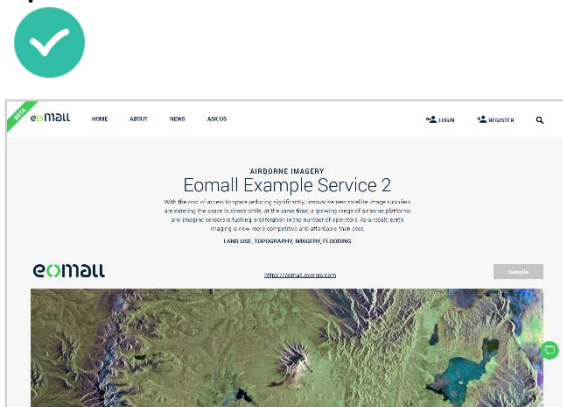

IMPORTANT: The value for the sub-category for the service must be selected. This will allow users to quickly find the service according to their needs in the search engine of eoMALL.

12.2.2. Service Name

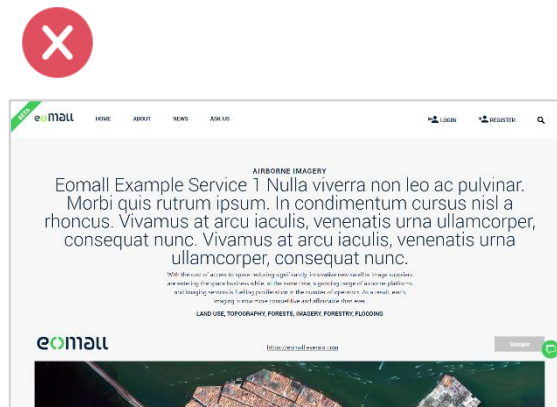

- Brief name of service as assigned by the Service provider.
- Make sure that the size of the service name does not exceed 115 characters.
- As a result, the title should be no more than 2 lines long. And as a result, the title will be better read on mobile devices.

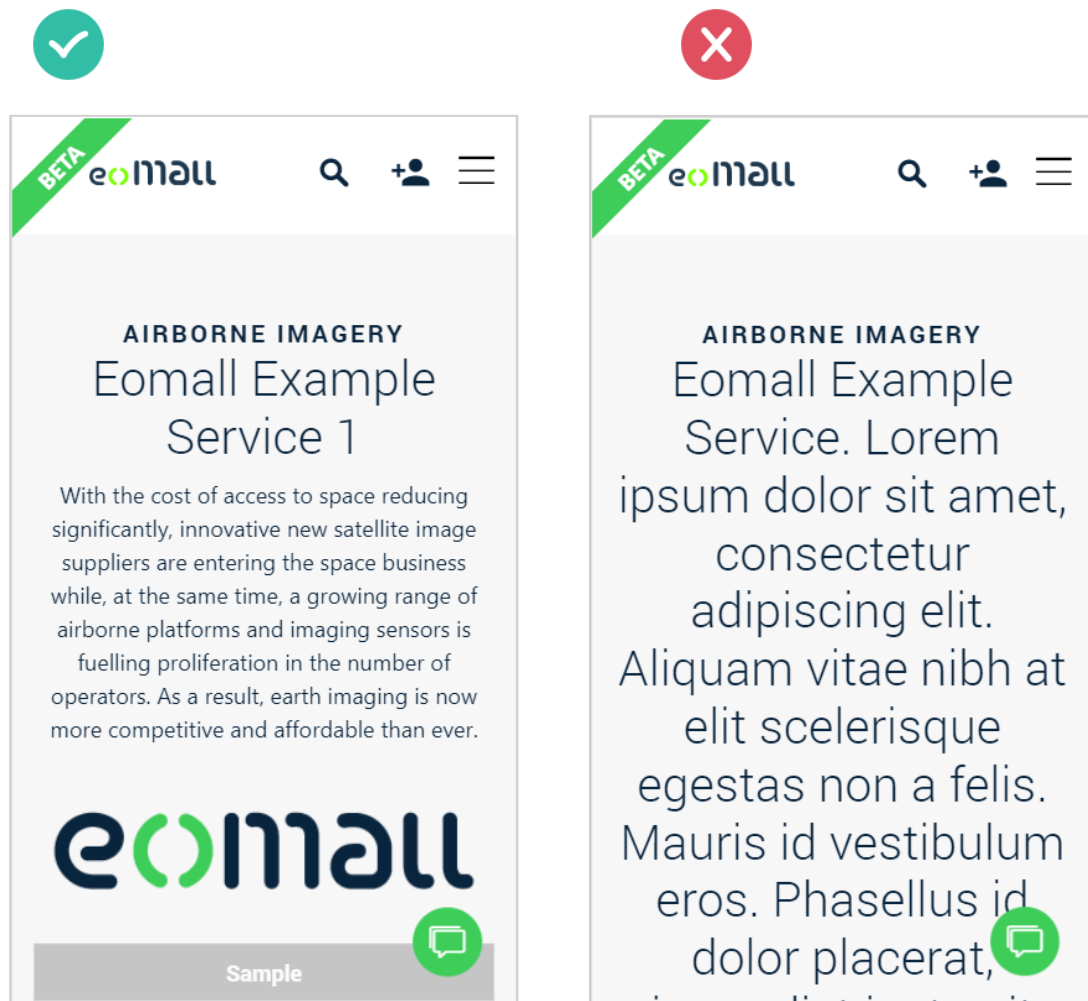

Examples of 'Good' and 'Bad' Content

The Name is short, easy to read and remember.

The Name is too long, difficult to read. Attracts too much attention.

The first screen of the mobile device. The short name is easy to read. Other elements of the page are visible. More information is available to the user at once.

The name does not fit on the first screen of the mobile device.

12.2.3. Service Abstract

Service Abstract

A brief description of the Service.

- Make sure that the size of the Service Abstract does not exceed 350 characters.
- Too short or no description at all will make it difficult to find by the user. The lack of description makes the service less attractive in comparison

with other services.

IMPORTANT: Try to convey the essence of the service in the first sentences. Since this description will highlight the service among other services presented in the catalogue on the main page of eoMALL. See Image.03.

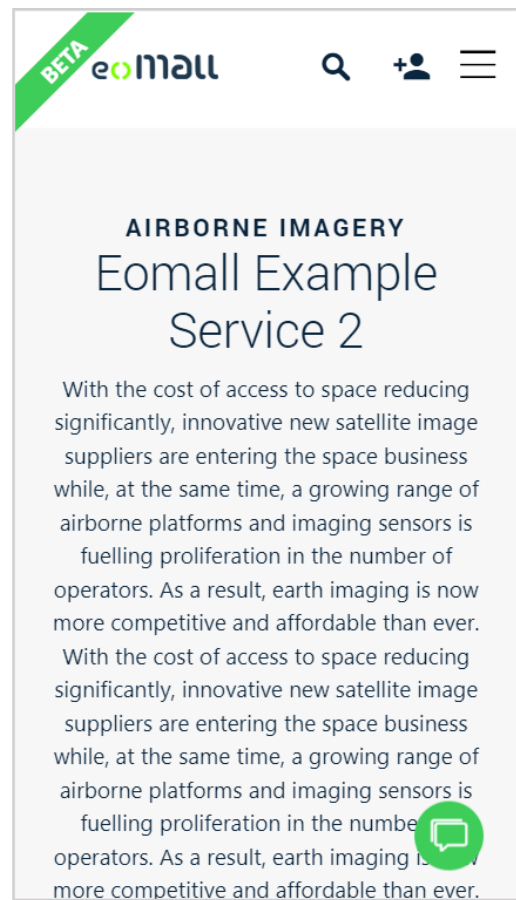

Image.03

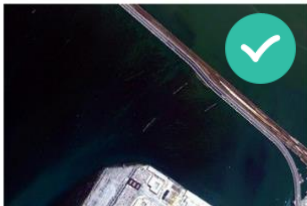

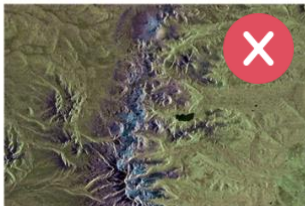

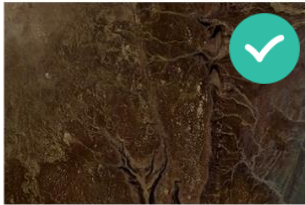

Examples of 'Good' and 'Bad' Content

The first screen of the mobile device. Service Abstract fits on the screen. The User immediately gets an overview of the Service.

Too long text on a mobile device makes it difficult to get acquainted with the Service.

	<p>Eomall example service 1</p> <p>With the cost of access to space reducing significantly, innovative new satellite image suppliers are entering the space business while, at the same time, a growing range of airborne platforms and imaging ...</p> <p>AIRBORNE IMAGERY</p> <p>Add to compare</p> <p>eomall</p>		<p>Eomall example service 2</p> <p>AIRBORNE IMAGERY</p> <p>Add to compare</p> <p>eomall</p>
	<p>Eomall example service 3</p> <p>AIRBORNE IMAGERY</p> <p>Add to compare</p> <p>eomall</p>		<p>Eomall example service 4</p> <p>With the cost of access to space reducing significantly, innovative new satellite image suppliers are entering the space business while, at the same time, a growing range of airborne platforms and imaging ...</p> <p>AIRBORNE IMAGERY</p> <p>Add to compare</p> <p>eomall</p>

The lack of Abstract description makes it difficult to choose. On the other hand, a well-written brief description allows the user to quickly get acquainted with the service and highlights it among others.

12.2.4. Service Taxonomy

Can be one or multiple values.

The user does not have to enter the value himself. It is only needed to select the appropriate value from the list (Metadata area in Admin panel).

In the end, the most popular user queries will be displayed here. For the current version of the application - all values selected in the area Metadata are displayed. It is recommended to choose max 5-6 most significant values.

Service Taxonomy

12.2.5. Logotype

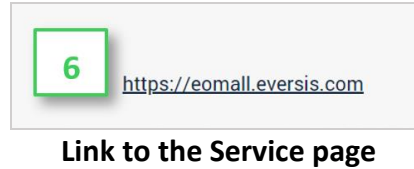

Logotype

- Direct loading of the Logotype into the system is performed when filling in the Company's page.

12.2.6. Link to Service page

- A link to the service page on the company website.
- You can set any link name.
Recommended not to use more than 60 characters.

12.2.7. Service Sample

- A link to a Sample of the Service.
- Service Sample can introduce potential users to the Service.
- If the parameter is absent, the button is not displayed on the page.

12.2.8. Main Service Image

Main Service Image

- It could be an image in Jpeg, PNG format.
- You should use high-quality images.
- Recommended using the aspect ratio of the images 16:9 (horizontal).
- In order to make the image look good on big screens, recommended image sizes 1470px at 830px.
- You should carefully consider the choice of the image. “Good” image makes the service instantly recognisable.

12.2.9. Service Description

- A high-level description of what the service offers. It may provide some element about the processing; cover the value provided by the service, in fairly non-technical terms. A definition of the deliverable.
- It is recommended not to exceed 100-120 words.

Product Description  

9 With the cost of access to space reducing significantly, innovative new satellite image suppliers are entering the space business while, at the same time, a growing range of airborne platforms and imaging sensors is fuelling proliferation in the number of operators. As a result, earth imaging is now more competitive and affordable than ever. This creates its own challenges in finding, selecting and ordering the imagery from among this plethora of choices, but at Geoconto, we are able to both exploit and manage this opportunity.

12.2.10. Service Benefits

10 Benefits

suppliers
platforms
earth
images in
t

- Affordable.
- Good results.
- Ultra resolution.

Service Benefits

- General benefits of using the Service.
- Benefits of using the service provide a point of appeal and show that the service can be useful for a user.
- It is recommended to add from 3 to 5 Benefits.
- Try to write down the Benefit in the form of a short phrase from 1 to 5 words.
- To Benefits list you could also add a short common description. A description should not exceed 250 characters.

12.2.11. Common Parameters

- List of common parameters for all type of Services.
- For Link parameters, you can set any link name.
- Recommended not to use more than 60 characters.
- If the information is not filled in, the parameter is displayed with an empty value.

12.2.14. Service Preview Image

On other pages, the Service is displayed as a preview in the list of services. The image for this preview is a separate image.

Recommendations for preview image:

- Recommended using the aspect ratio of the images 16:9 (horizontal).
- You could use the same image as for Main Service image. But before the final publication, it is recommended to check how the image will look in the size of 375px at 210px.
- It could be an image in Jpeg, PNG format.
- You should use high-quality images.

12.3. Parameters table

12.3.1. Service structure type (Software)

Page Elements	Parameters (Admin panel)	Comment/Example
Service Name	Service Name	<i>Comment:</i> Brief name of service as assigned by the service provider. Recommended not to exceed 115 characters. For more information, see 3.2.2. Service Name.
Logotype	Service logo image	<i>Comment:</i> Logo of the company providing the Service.
Service Preview Image	Search result image	<i>Comment:</i> This image will be visible on search results and service previews. You should use the aspect ratio of the images 16:9 (horizontal). You should also specify Image Description. This will

		ensure the availability of content for people with disabilities For more information, see 3.2.14. Service Preview image.
Main Service Image	Main header image	<i>Comment:</i> This image will be visible on search results and service previews. You should use the aspect ratio of the images 16:9 (horizontal). You should also specify Image Description. This will ensure the availability of content for people with disabilities. For more information, see 3.2.8. Main Service Image.
	Service Provider	<i>Comment:</i> User does not need to enter a value by himself. Information about Service provider will be generated automatically.
Service Category	Service Sub Category	<i>Comment:</i> Multiple choice. Can be one or multiple values under one service category. <i>Example:</i> If the service category is Intermediate then the subcategory can be any or all of UAV, Airborne or Spatial.
Service Description	Service Description	<i>Comment:</i> High-level description of what the service offers. It may provide some element about the processing, cover the value provided by the service, in fairly non-technical terms. A definition of the deliverable. For more information, see 3.2.9. Service Description.
Service Abstract	Service Abstract	<i>Comment:</i> A brief description of the Service. For more information, see 3.2.3. Service Abstract.
Common Parameters	Service Language	<i>Comment:</i> Service Language it is the language of the user interface. <i>Example:</i> English

13.Success story

This is the main page presenting your Success Story page. To create the content of the Success pages, the user must have Provider rights and access to the Admin panel.

13.1. Goals

- Create correct visual side of Company page within the portal.
- Create unique content due to the Google search engine. If the search engine finds two identical content, it does not index the duplicate content as unique.
- To acquaint the user with the company as much as possible.
- Create attractive content for potential clients.

13.2. Elements

Image.04 below shows the Success story page with the correct content. The numbers on the page indicate the main elements, which the user needs to perform on their own in the administration panel. The number  is located on the left side of the element.

Next, each element will be viewed in more detail.

Common rules:

- Provide content in correct oral and grammatical English language.
- Make sure that this content is unique and not to copy and paste the content of your website.
- You should provide a description and select a value for all parameters that describe your Organization.

Use simple language to make it accessible to all people, not just professionals.
